FSANZ: Applications and Submissions - Submission

Tuesday, 20 April, 2010

1. **Assessment Report Number:** A1035
2. **Assessment Report Title:** Food derived from insect-protected soybean MON 87701
3. **Organisation Name:** W.I.N. HEALTH COACH CLINICS
4. **Organisation Type:** Individual
5. **Representing:** DR FRANK R GOLIK
6. **Street Address:** [REDACTED]
7. **Postal Address:** as above
8. **Contact Person:** DR GOLIK
9. **Phone:** [REDACTED]
10. **Fax:** [REDACTED]
11. **Email Address:** [REDACTED]
12. **Submission Text:** I cannot see the extensive animal studies performed over several years showing no adverse effects in the DNA/ RNA of somatic or gamete cells. To even contemplate releasing this product or other GMO "foods" without extensive and totally independent Australian (e.g. CSIRO Adelaide) testing in several species over many generations is astounding. This company has not demonstrated an ethical nor open-disclosure pattern of behaviour in the past. I can only hope that FSANZ can demonstrate that they are genuinely interested and concerned for the ultimate safety of our population's genetics and epigenetics. Studies in animal models have demonstrated environmentally influenced epigenetic changes being transmitted up to FOUR generations. If we make a grave mistake due to commercial influence and/or pressure, we have a long time to regret our hasty decisions. Yours sincerely Dr Frank R Golik
