

19/1/14

Submission.

A 1089: Food derived from Herbicide-tolerant Canola line DP-073496-4.

I oppose granting permission to this application.

Reason.

I am unable to find any statement(s) in the documents provided by the applicant detailing whether or not the laboratories carrying out the food safety assessments were independent of the applicant and ^{not} funded or supported by the applicant.

Nor am I able to find any statement that no aspects or results of the food safety assessments were excluded from the documents provided to FSA/2.

Consequently, the credibility of those safety assessments must be questioned. There is no assurance that the safety results sought by the applicant have been provided, while those that could be construed as negative have been omitted.

PAUL ELWELL-SUTTON.
