Re: Food Derived from Herbicide-tolerant and Insect-protected Corn Line MON87411

FTA Australia has reviewed this [Application](#) and endorses the following comments of the Technical Sub Committee:

The Committee did not have any objections to Food Derived from Herbicide-tolerant and Insect-protected Corn Line MON87411 in Australia and supported this opinion with the following points:

- The corn line is not being grown in Australia
- Its major use is for making of corn syrup or corn starch and as such would not require labelling
- If the whole corn or product containing novel DNA and/or novel protein was imported it would be subject to labelling requirements noted in Standard 1.5.2, allowing consumers to make a choice.

If there are any queries regarding this submission, please contact the Technical Secretary of the Technical Committee: [REDACTED]

We would appreciate being maintained on the circulation list for any changes in this matter and to receiving notification of the next step concerning this [Application](#).

Yours sincerely,

Del Teesdale
PRESIDENT – FTA AUSTRALIA
