Food Standards Code –  
Amendment No. 105 – 2009*

## ***Australia New Zealand Food Standards Code – Amendment No. 105 – 2009***

### ***Food Standards Australia New Zealand Act 1991***

#### **Preamble**

The variations set forth in the Schedule below are variations to Standards in the *Australia New Zealand Food Standards Code* published by the National Health and Medical Research Council in the *Commonwealth of Australia Gazette*, No. P 27, on 27 August 1987, which have been varied from time to time.

#### **Citation**

These variations may be collectively known as the *Australia New Zealand Food Standards Code – Amendment No. 105 – 2009*.

#### **Commencement**

These variations commence on 15 January 2009.

### **SCHEDULE**

[1] ***Standard 1.1.1*** is varied by –

[1.1] *inserting in clause 2 –*

**galacto-oligosaccharides** means a mixture of those substances produced from lactose by enzymatic action, comprised of between two and eight saccharide units, with one of these units being a terminal glucose and the remaining saccharide units being galactose, and disaccharides comprised of two units of galactose.

**inulin-derived substances** means mixtures of polymers of fructose with predominantly  $\beta$  (2→1) fructosyl-fructose linkages, with or without a terminal glucose molecule and includes inulin, but does not include those polymers of fructose produced from sucrose by enzymatic action.

[1.2] *inserting after clause 9 –*

#### **9A Certain substances not nutritive substances**

Inulin-derived substances are taken not to be nutritive substances.

[2] ***Standard 1.4.1*** is varied by omitting from the Table to clause 2, under the heading Cadmium, the entry for Peanuts, substituting –

Peanuts	0.5
---------	-----

[3] ***Standard 1.4.2*** is varied by –

[3.1] omitting from Schedule 1 the chemical residue definition for the chemical appearing in Column 1 of the Table to this sub-item, substituting the chemical residue definition appearing in Column 2 –

COLUMN 1	COLUMN 2
CLOTHIANIDIN	CLOTHIANIDIN

[3.2] inserting in Schedule 1 –

[4] *Standard 2.9.1 is varied by –*

[4.1] *inserting after clause 9 –*

**9A Permitted inulin-derived substances and galacto-oligosaccharides**

(1) Infant formula product may contain no more than –

- (a) 110 mg per 100 kJ of inulin-derived substances; or
- (b) 290 mg per 100 kJ of galacto-oligosaccharides; or
- (c) 290 mg per 100 kJ of combined inulin-derived substances and galacto-oligosaccharides, where the inulin-derived substances is no more than 110 mg per 100 kJ.

(2) For subclause (1) the maximum permitted amount only applies when the substances are added. In that case the maximum permitted amount then applies to the sum of the naturally occurring and the added substances.

[4.2] *omitting paragraph 16(1)(c), substituting –*

- (c) the average amount of each vitamin, mineral and any other nutritive substance permitted by this Standard expressed in weight per 100 mL; and
- (d) when added, the average amount of –
  - (i) a combination of inulin-derived substances and galacto-oligosaccharides; or
  - (ii) inulin-derived substances; or
  - (iii) galacto-oligosaccharides

expressed in weight per 100 mL.

[4.3] *omitting paragraph 16(2)(d), substituting –*

- (d) a declaration –
  - (i) of the weight of one scoop in the case of powdered infant formula; and

- (ii) of the proportion of powder or concentrate required to reconstitute the formula according to directions; and
- (e) when added, the average amount of –
  - (i) a combination of inulin-derived substances and galacto-oligosaccharides; or
  - (ii) inulin-derived substances; or
  - (iii) galacto-oligosaccharidesexpressed in weight per 100 mL.

[4.4] *omitting clause 20, substituting –*

- (1) The label on a package of infant formula product must not contain –
  - (a) a picture of an infant; or
  - (b) a picture that idealises the use of infant formula product; or
  - (c) the word ‘humanised’ or ‘maternalised’ or any word or words having the same or similar effect; or
  - (d) words claiming that the formula is suitable for all infants; or
  - (e) information relating to the nutritional content of human milk; or
  - (f) subject to clause 28, a reference to the presence of any nutrient or nutritive substance, except for a reference to a nutrient or nutritive substance in –
    - (i) clause 30 – claims relating to lactose free formula or low lactose formula; or
    - (ii) Standard 1.2.4 – Labelling of Ingredients; or
    - (iii) clause 16 – declaration of nutrition information; or
  - (g) subject to Division 3, a representation that the food is suitable for a particular condition, disease or disorder.
- (2) Subject to clause 28, the label on a package of infant formula product must not contain a reference to inulin-derived substances or galacto-oligosaccharides except for a reference to either substances in –
  - (a) a statement of ingredients; or
  - (b) the nutrition information statement.

[4.5] *omitting the Nutrition Information table in the Guidelines for Infant Formula Products, substituting –*

[4.6] *deleting the Note at the end of the Nutrition Information table in the Guidelines for Infant Formula Products*

[5] *Standard 2.9.2 is varied by –*

[5.1] *omitting paragraph 2(2)(b) substituting –*

(b) lactic acid producing cultures; and

- (c) either singularly or in combination, no more than 0.8 g/ 100 g of inulin-derived substances and galacto-oligosaccharides, as consumed.

(3) For paragraph 2(2)(c) the maximum permitted amount only applies when the substances are added. In that case the maximum permitted amount then applies to the sum of the naturally occurring and the added substances.

[5.2] *omitting subclause 2(3) and the heading to the Table to paragraph 2(3)(c), substituting –*

(4) Food for infants must not contain –

- (a) more than 50 mg/100 g of total iron in cereal-based food on a moisture free basis; or
- (b) honey, unless it has been treated to inactivate *Clostridium botulinum* spores; or
- (c) more than the total quantity of sodium set out in column 2 of the Table to this paragraph for each particular type of food for infants; or
- (d) added salt, in the case of ready-to-eat fruit-based foods, fruit drink and vegetable juice.

#### **Table to paragraph 2(4)(c)**

[5.3] *omitting subclause 2(4) and the Editorial note, substituting –*

(5) Food for infants intended for infants under the age of 6 months must be formulated and manufactured to a consistency that minimises the risk of choking.

**Editorial note:**

The intent of subclause (5) is to ensure that the food, except in the case of rusks, should have a texture that is soft and free of lumps.

[6] *Standard 2.9.3 is varied by inserting in clause 6 –*

(4) Formulated supplementary foods for young children may contain singularly or in combination, no more than 1.6 g of inulin-derived substances and galacto-oligosaccharides per serving.

(5) For subclause 6(4) the maximum permitted amount only applies when the substances are added. In that case the maximum permitted amount then applies to the sum of the naturally-occurring and the added substances.
