**Subject:** Proposal P1016 - Hydrocyanic Acid in Apricot Kernels & other Foods

Proposal P1016 - Hydrocyanic Acid in Apricot Kernels & other Foods

This submission is to support the continuing legal sale of apricot kernels.

There is much evidence supporting foods containing "dietary cyanides" being a valuable therapeutic tool, and the "cyanide" is an essential part of the treatment value.

Current scientific investigation suggests these compounds have a variety of uses including the treatment of congestive heart failure, lowering cholesterol, flavourings, antibiotics and sweeteners.

I oppose the proposal on the grounds that these therapeutic foods may be life saving.

I do not give my permission for my personal details to be published publicly.
