

**Comments from the Victorian Department of Health and the Victorian Department of Energy, Environment and Climate Action.**

**Due date of submission – 3 March 2023**

The Victorian Departments of Health and Energy, Environment and Climate Action (the departments) welcome the opportunity to respond to this Proposal to amend the Australia New Zealand Food Standards Code (the Code).

Proposal P1061 – *Code Maintenance Proposal 2023*.

The departments support the progression of Proposal P1061 for the 58 proposed amendments to be made to the Code.

Given the nature of Proposal 1061, it is timely for the departments to highlight a minor amendment not included in the proposal.

Standard 4.2.8 Primary Production and Processing Standard for Leafy Vegetables

Section 4.2.9-8 Weather Events

The issue being the section number includes a typographical error by referring to Standard 4.2.9 Primary Production and Processing Standard for Melons rather than Standard 4.2.8, and therefore requires correction to Section 4.2.8-8 Weather Events.
